

GILBERT RAE

ESTABLISHED
1868.

AERATED WATER MANUFACTURER

DUNFERMLINE.

WATSON

DAVID WATT, DUNFERMLINE

IN submitting this Circular to my Patrons, I beg most respectfully to say that, in manufacturing Aerated Waters, I have always aimed at a High-class Grade; and have great pleasure in stating that every year my Goods have met with increasing demand and favour.

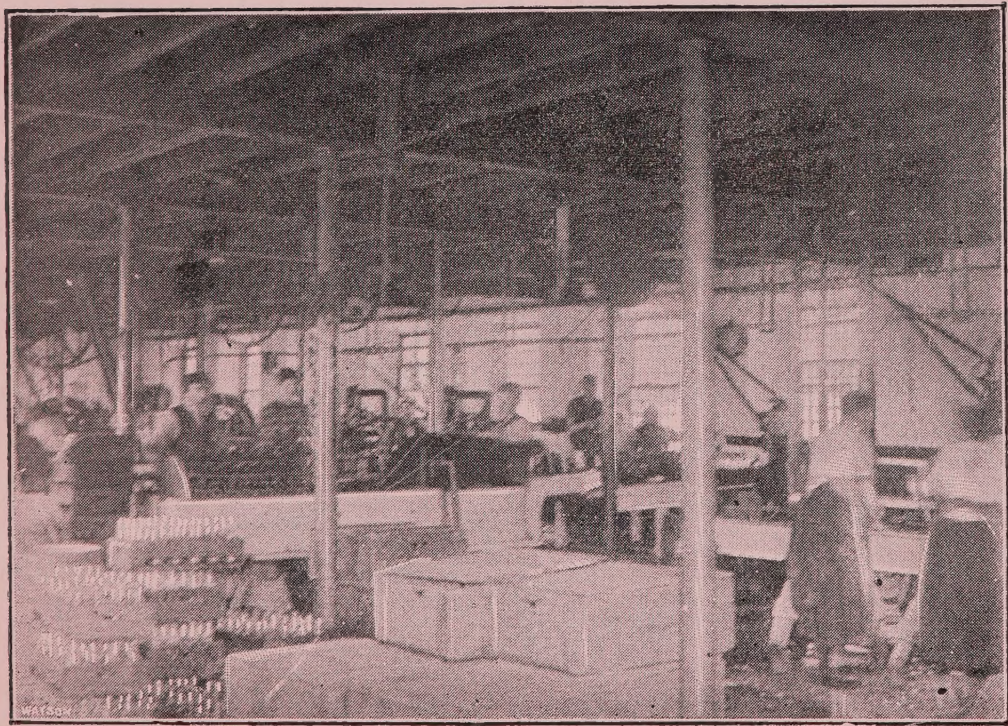

I have practical knowledge (chemically and mechanically) of the Business and every known method for the production of an article of the highest grade, sparing neither time nor money to manufacture Aerated Waters with a grip and wholesomeness calculated to prove a constitutional benefit to all Consumers.

GILBERT RAE,

MANY people say that the manufacture of Potash and Soda Water is cheaply effected, costing next to nothing. Great fallacy! The virtue of a bottle of Potash or Soda Water consists in its manufacture.

My Ginger Beverages—of which I am the pioneer manufacturer in Scotland—are well-known all over the Country.

Lemonade (perhaps the most popular of all beverages) I give great attention to, and it is pronounced by all Scientists to be a most beneficial beverage.

Aerated Water Manufacturer, DUNFERMLINE.

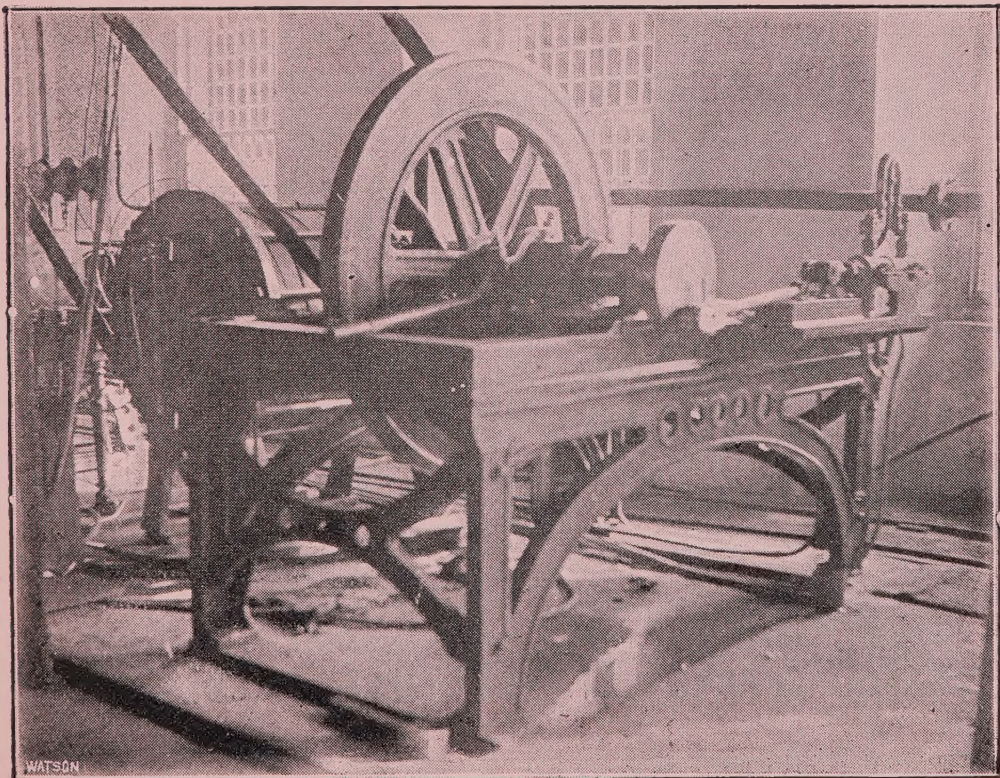

Corner of Machine-Room.

GILBERT RAE,

THE Water used is from the Devon—perfectly pure—perhaps the best for a public supply in all the United Kingdom. For further precautions it is filtered through 12 feet of pure sand, stored in tanks (hermetically sealed). These work night and day, and the result is a Water perfectly bright and clear as crystal.

Aerated Water Manufacturer, DUNFERMLINE.

Corner of Machine-Room.

GILBERT RAE,

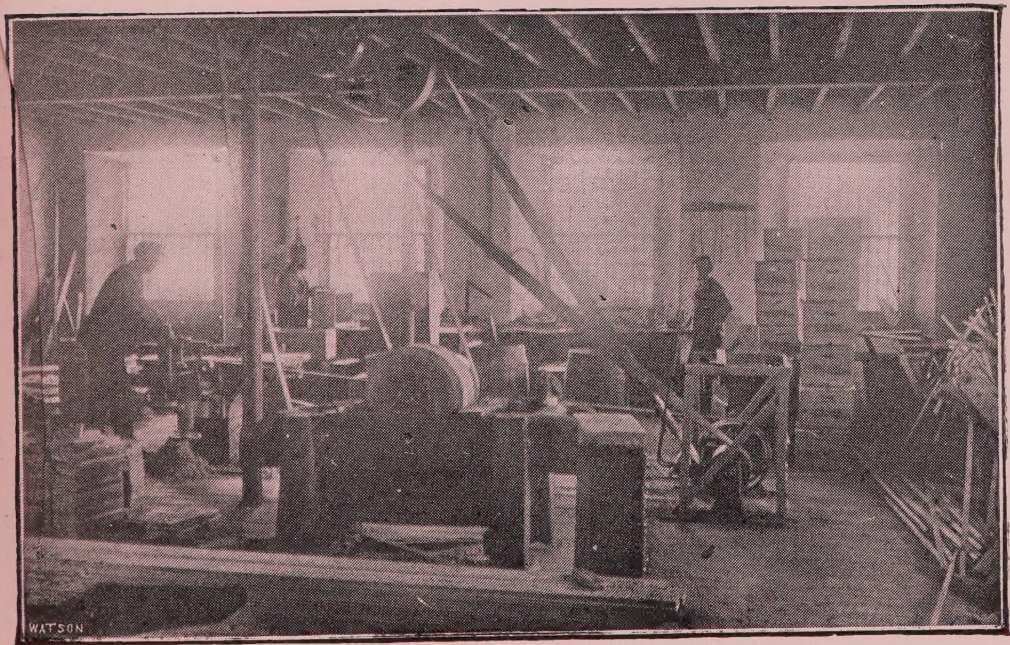

IF you have not given my Waters a trial, please do so; they are certain to give you satisfaction.

All Orders entrusted to the Agents shall be promptly executed.

The Works cover four acres of Floorage, are worked by a powerful Steam Engine, and lighted throughout by Electricity.

Aerated Water Manufacturer, DUNFERMLINE.

Packing-Case Shop.

GILBERT RAE,

THE following are a few of my Inventions:—

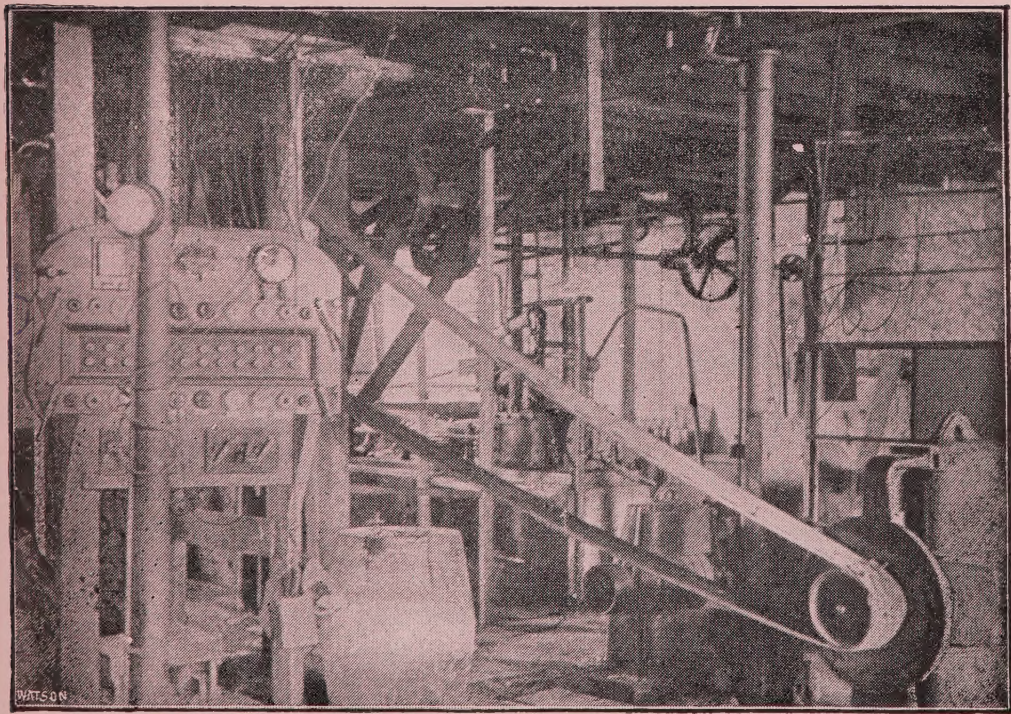

The Inventor of Appliance for the Extraction of Air from the Water before Carbonating.

Inventor and Patentee of a unique and successful Germ-preventing Syrup-Filling Appliance, a wonderful scientific apparatus through which all the Syrups are clarified. For many years there was a great need for some appliance to exclude germs while the filling of Syrup was being done.

Inventor and Patentee of Screw-Top Syphon Bottle for the Dinner-table, used for Lemonade, Ginger Beer, Kola, etc.

Inventor and Patentee of Steam-power (Cork) Filling Machine, and many other useful appliances in connection with Manufacture of Aerated Waters.

Aerated Water Manufacturer, DUNFERMLINE.

GILBERT RAE,

WING to the fact that the Works go on every working day the same—Winter and Summer alike—workers and appliances being under personal supervision, everything regular, methodical, scrupulously clean and orderly, anything tending to contaminate the delicate flavour, or anything that would be detrimental in the slightest degree to the quality of Goods manufactured, is removed at once.

Aerated Water Manufacturer, DUNFERMLINE.

WATSON

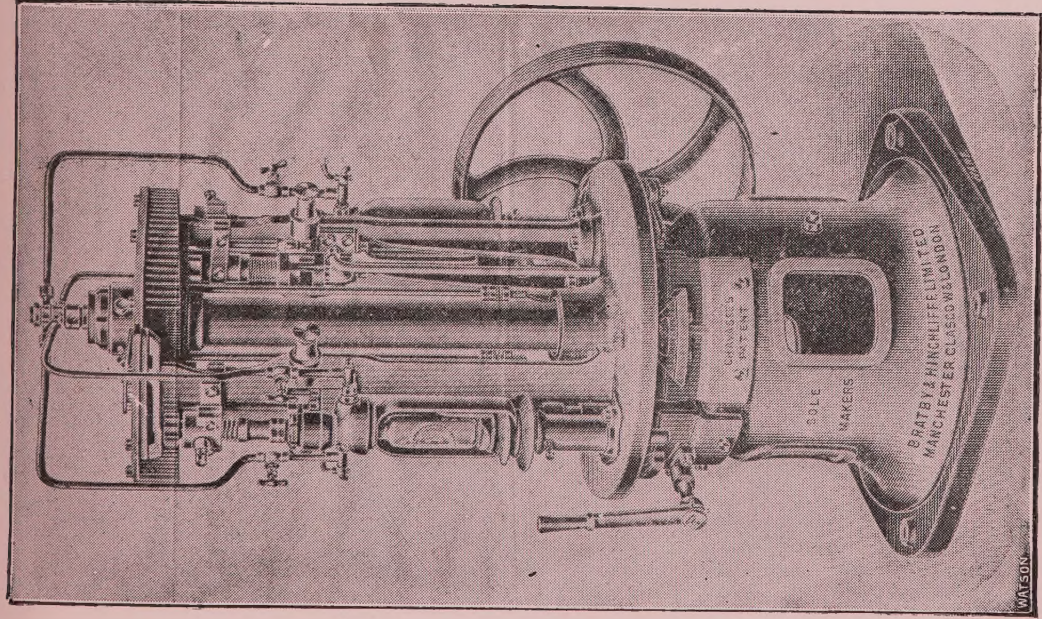

Packing-Room.

GILBERT RAE,

BY such attention and regularity I am enabled to sell my Goods at a popular price. My aim being to give the public a palatable, satisfying beverage—something to satisfy a craving which all mankind is affected with—I humbly take credit that my efforts in that direction have so far proved successful, judging from the continued increase of the Business.

Aerated Water Manufacturer, DUNFERMLINE.
